

For MAS 90® & MAS 200®

WWW.MAPADOC.COM

MAPADOC® saves time and money!

MAPADOC by SWK Technologies, Inc. is a fully integrated, easy to use electronic data interchange (EDI) solution for MAS 90 and MAS 200 that will:

- Dramatically cut data entry time and costs by eliminating duplicate entries
- Improve communication with vendors
- Integrate seamlessly with MAS 90 and MAS 200 by Sage Software®
- Reduce mapping time by over 75% by allowing end-users to quickly and easily create their own maps for integrated documents

MAPADOC offers power and flexibility!

The MAPADOC mapping utility enables end-users to easily update maps on the fly
Our unique EDI mapping wizard for inbound purchase orders (850) and outbound invoices (810) cuts mapping time by over 75%. When vendors institute new rules, you will be ready.

MAPADOC allows mapping to/from MAS 90 and MAS 200 fields, preset variables and user defined fields (UDFs). You can assign cross-reference values and perform pre-processing and post-processing data format conversions. Available cross-references include item, ship to, ship via, warehouse address code and UPC code.

MAPADOC is a Complete Solution

Inbound Purchase Order (850) Creation

- Assign unique sales order sequences to each trading partner
- Create multiple sales orders from one purchase order
- Create backorders
- Easily run exception reports
- Validate incoming data against existing data
- Explode kit items

Outbound Invoice (810) Creation

- Automatically send outbound invoices after sales journal updates
- Issue credit and debit memos
- Consolidate invoice creation
- Resend invoices from history
- Assign a range of customers or divisions to factor/trading partners

Outbound Advance Ship Notice (856) Creation

- Use trading partner specific item IDs, carton IDs, UCC qualifiers, UCC 128 label formats and package indicators
- Skip hierarchy level (HL) pack and order information
- Calculate UCC bill of lading numbers
- Automatically create ASNs for a range of sales orders and ship dates
- Assign sales order ranges to ASNs. You can select by trading partner, sales order, purchase order, ship to code, ship to fax, ship date, ship via, warehouse and DC code
- Auto-generate invoices from ASNs
- Create VICs bill of lading reports

Flexible Shipment Processing

- Automatically create shipment package information according to setup options
- Automatically pack items according to case quantities entered in item cross reference
- Automatically pack specific items or an entire order into one case
- Create UCC 128 labels
- Reselect individual cases for label reprinting

Order Pick/Pack Data Entry

- Create labels for one case at a time or for the entire order
- Pack the remaining items into one case or create additional cases with the same items and quantities

Order Pick/Pack Integrates With StarShip

- Pass information to and from StarShip
- Record tracking numbers and freight information on orders and invoices
