The Right Solution for You

Designed to fill the gap between entry-level and complex high-end systems, Sage BusinessVision 50 Accounting - Standard Edition provides small and midsized organizations with the business management and accounting system they need to succeed in today's business environment.

Complete with eighteen fully integrated modules, and five-user ready, Sage BusinessVision - Standard Edition delivers the business and financial tools you need to streamline your business, improve productivity, and increase profits—at an affordable price.

The Right Solution for Your Business

Sage BusinessVision business management and accounting systems are easy to learn, easy to use, and yet powerful enough to provide you with the sophisticated processing and management functions you need to compete in today's business world.

The intuitive interface of Sage BusinessVision - Standard Edition puts all the information you need right at your fingertips. For example, you can review the complete picture of a customer, including open sales orders; sales order history; comparative sales per period for this year and last year; and past and outstanding accounts receivable transactions—all from one single module.

Sage BusinessVision - Standard Edition helps you to manage your receivables, payables, orders, sales, purchases, inventory, light manufacturing, jobs, general ledger, budgets, and payroll. Sage BusinessVision - Standard Edition manages most of your daily accounting requirements automatically, so you don't need expert accounting or bookkeeping knowledge. For example, when the system processes an invoice, it automatically adjusts stock levels, sales statistics, sales and cost accounts, taxes, and accounts receivable.

The "batching" of transactions from one module to another is a thing of the past—and month-end-closes simply do not exist. Sage BusinessVision - Standard Edition eliminates the need to close one month before starting the next. The system posts transactions to the applicable period based on the date of the transaction or activity. Year-end processing is automatic, and you can continue to apply backdated transactions to the previous year, even after the year-end.

Sage BusinessVision 50 Accounting - Standard Edition

Real Time Business Information

With Sage BusinessVision, - Standard Edition you can view up-to-the-minute information at anytime, helping you to make the right decisions for your business. Customers, vendors, orders, inventory, receivables, payables, job-cost, payroll, sales analysis, purchase analysis, budgeting, and general ledger information is available to view on screen for the time period you desire—provided you have the appropriate access authority.

And with a reporting suite of over 190 pre-designed reports, forms, and graphs, you'll know exactly how well your business is doing at any moment. With the built-in report designer, you can also create and modify your own forms and reports, and publish them in practically any format. Export your reports to Microsoft Word and Excel, HTML, and even e-mail your clients their invoices and statements.

High Level Security

Protecting your data—one of your most valuable company assets—is of paramount importance in today's business world. Sage BusinessVision - Standard Edition provides full security features. Access codes and passwords prevent unauthorized access to sensitive business records, and authorization settings allow users limited or full access to your valuable business information.

Flexible

You can customize Sage BusinessVision - Standard Edition in a number of ways. For example, you can print onto common business forms and you can adjust the terminology to suit your type of business. If, for example, you call a part number a "stock code", or a supplier account number a "vendor code", you simply adjust the terminology once and it then takes effect globally.

With the addition of Sage BusinessVision CustomPack, you can even add up to fifty additional fields per module, using the terminology that suits your business; plus get document linking and mail merge capabilities, customer specific pricing, and the "SuperTicker" information monitor.

Seamless Integration

Seamlessly integrated with Microsoft Office, Sage BusinessVision - Standard Edition enables you to easily publish financial reports in Microsoft Word, analyze financial reports in Microsoft Excel, or populate a Microsoft Access database. Sage BusinessVision - Standard Edition also comes ready enabled with a dynamic link to the popular ACT! by Sage contact management system. The ACT! by Sage database is updated immediately, whenever changes are made in Sage BusinessVision - Standard Edition, and vice versa, giving you a complete picture of your business from beginning to end.
